HERRINGBONE
IN MODERN STYLE**

HERRINGBONE FLOORING CONSTRUCTION

Wood protection system

UP to 7 layers of UV-hardened
acrylic lacquer
or a system of natural oil.

CROSSLOCK joint

Crosslock is the latest joint designed by Barlinek, which facilitates the arranging of the Herringbone Pattern in a clean, quick and easy manner. Its profile allows the installing of the above-mentioned pattern without the need for both the right and left side floorboards at the same time.*

Surface layer

Selected European wood of the appropriate thickness, protected with a lacquer or oil finish.

Middle layer

Coniferous layer arranged laterally to the surface and a bottom layer. Such construction limits the natural movement of the wood and prevents gaps, cracks and squeaking - even in constantly changing weather conditions.

Bottom layer

Coniferous wood arranged laterally to the middle layer reduces the natural work of wood.

The advantages of the Crosslock joint

- A clean, quick and easy assembly without using special tools
- An arrangement system which does not require using both right and left floorboards
 - No risk of damaging the joint during assembly

*Detailed information regarding the installation and use of the Herringbone Pattern can be found in the assembly instructions and the guarantee certificate.

**Oak
Cappuccino
Herringbone
Piccolo**

A one-strip oak floor with a delicate creamy-white colouring. Boards enriched by brushing and protected with matt lacquer.

**Oak
Toffee
Herringbone
Piccolo**

Single plank oak floor immersed in shades of gold and warm brown. The slenderness of the boards coated with natural oil was achieved by 4-sided bevelling. The uniqueness and abundance of the wood was emphasized in the brushing process.
