

WATERPROOF  
MINERAL CORE

more than wood

MADE IN  
EUROPE

natural

waterproof

durable

**revolution in flooring**

living room ✓ bathroom ✓ kitchen ✓

[barlinek.com](http://barlinek.com)

the only ones on the market

what sets us apart

## 100% waterproof

- ✓ water- and moisture-resistant mineral core
- ✓ waterproof lock connecting individual elements
- ✓ unique coating system providing perfect protection for the surface and bevels

## durable

- ✓ highly resistant to abrasion and micro-scratches highest parameters of the coating system
- ✓ highly resistant to dents DENSCORE PRO core provides solid support
- ✓ stain resistant hassle-free in everyday use

## stable base

- ✓ possibility of installing heavy structures without expansion joints e.g. kitchen islands, cupboards
- ✓ one floor throughout the entire house no threshold expansion joints up to 144 m<sup>2</sup>

## for all types of heating

- ✓ hot-water and electric heating systems including infrared heating mats

## natural

- ✓ specially selected Barlinek wood
- ✓ a wide variety of designs brushed and bevelled, available in a wide colour range with a super matt finish
- ✓ format combinations long boards and herringbone pattern

## clean and quick renovation

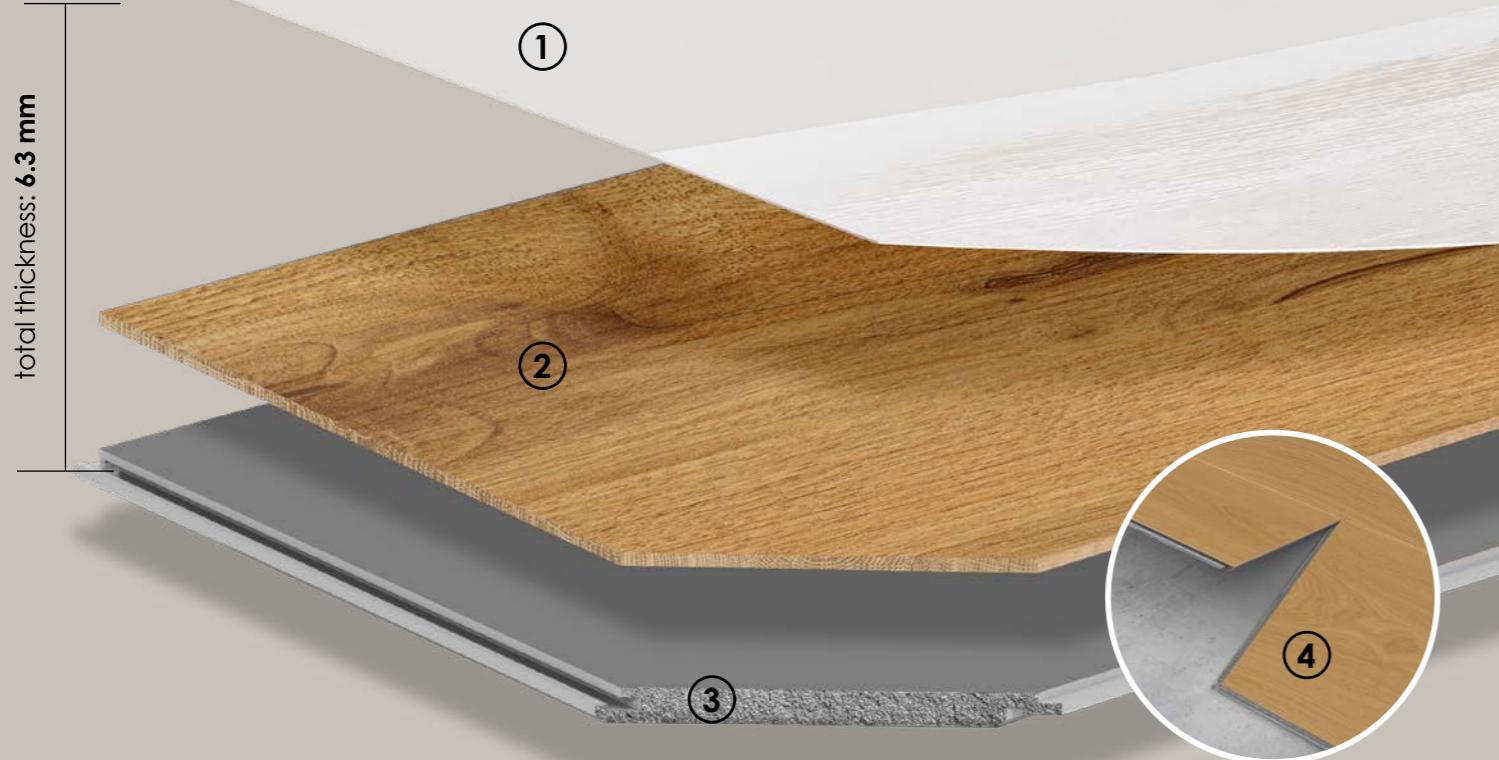

- ✓ installation on existing floors
- ✓ wall installation

## safe

- ✓ eco-friendly ZERO WASTE production
- ✓ non-slip certified DS anti-slip rating
- ✓ quiet reduces impact noise by up to 50%
- ✓ flame -retardant suitable for public-use buildings
- ✓ harmless no emission of harmful substances

# construction

## ① paint coating

super matt varnish with high resistance to scratches and stains

## ③ denscore PRO

mineral core manufactured by extruding calcium carbonate and refining additives

**DENSCOR<sup>EQ</sup> PRO**

196.5 x 770-1546 x 6.3 mm

196.5 x 612-1230 x 6.3 mm

166.5 x 612-1230 x 6.3 mm

## ② wood layer

natural oak veneer

## ④ I4F glueless lock

durable and fully waterproof, reliable click installation system

126.4 x 632 x 6.3 mm

91.3 x 547.8 x 6.3 mm

# classification

MADE IN  
EUROPE

## ESTHETIC

Varied color scheme  
Occasional features  
• Small, medium healthy knots  
• Small filled knots and cracks  
• Edge sapwood

## ORIGIN

Any colour scheme  
Occasional features  
• Medium, large healthy knots  
• Small and medium filled knots and cracks  
• Sapwood

# benefits

**FUTURIS Esthetic Oak**  
196.5 × 770-1546 × 6.3 mm

**FUTURIS Esthetic Oak Herringbone**  
126.4 × 632 × 6.3 mm

**FUTURIS Esthetic Oak Herringbone**  
91.3 × 547.8 × 6.3 mm

## RECOMMENDED UNDERLAY EXTREME 1.5 MM

- ✓ professional and strong underlay, designed to protect the floor and improve its properties during use
- ✓ ideal for underfloor heating and cooling (very low thermal resistance and excellent conductivity)
- ✓ maximises floor soundproofing and protects board joints, eco-friendly – up to 90% natural ingredients

### parameters:

- compressive strength > 500 [kPa]
- thermal resistance coefficient – up to 0.009 [m<sup>2</sup>K/W]
- room sound reduction – up to 22 [%]
- density – approx. 1000 [kg/m<sup>3</sup>]
- flame retardancy – class Cfl-s1
- packaging 10 m<sup>2</sup>
- thickness 1.5 mm

Wood is a natural material that is characterised by its lack of repeatability. Individual photos of boards may not fully reflect the appearance of the products. The colour of the ordered product may differ from the colour chart available at the point of sale.
